

Advanced Entry

Certain programmes have Recognition of Prior Learning, which recognise previous training, work experience or professional exams towards gaining credit towards your degree. Your study time will thus be reduced.

Polytechnic and diploma students can try to gain advanced entry, provided their current study is approved by the university.

Contact your HRDS Education Planner if you wish to be considered for advanced entry. The team at HRDS will assist by contacting the relevant staff at the university to start the process of matching your current studies with those at your proposed university. Please note that the university will still require you to have achieved a certain grade for every subject that you wish to be considered for exemption.
